SITUATION SUMMARY

Public Health and Medical (EF-8) Situation Report

Ebola Virus Disease (EVD) Outbreak

Report Date: September 19, 2014

Operational Period: September 11-18, 2014

CDPH/EMSA

Summary:

The outbreak of Ebola Virus Disease (EVD) in the West African nations of Guinea, Sierra Leone, and Liberia continues to expand but does not pose a significant risk to the United States. A small cluster of cases had been identified in Nigeria associated with one person, but the virus does not appear to have been widely spread in Nigeria.

In the West African nation of Senegal, one case had been confirmed but as yet there have been no deaths or further suspected cases attributable to EVD. As of September 16, the World Health Organization has reported a cumulative total of 4963 suspect, probable, and confirmed cases and 2453 deaths. The U.S. Centers for Disease Control and Prevention (CDC) has advised travelers to avoid all non-essential travel to the West African nations of Guinea, Sierra Leone, and Liberia. CDC continues to issue a level 2 travel notice for Nigeria. Based on the current situation in West Africa, CDC considers the risk of importation of EVD into the United States to be very low. However, the outbreak is evolving, and this assessment may change. The Democratic Republic of Congo in Central Africa has reported cases of Ebola. These cases are not related to the ongoing outbreak in West Africa.

- **There are currently no confirmed or suspect cases of Ebola under investigation in California.**
- **At present, the weekly situational assessment for the risk of Ebola infection in California is very low.**
- CDPH continues to work with the healthcare community and local health jurisdictions to identify potential suspect cases and avoid spread of the disease.

New guidelines and updated guidelines released by CDC are posted on the CDPH CDER website available at: (<http://cdph.ca.gov/programs/cder/Pages/Ebola.aspx>). Likewise, EMSA has developed guidelines for EMS personnel based on the recommendations of CDC. These have been distributed to Local EMS Agency (LEMSA) Administrators, LEMSAs Medical Directors and the Regional Disaster Medical Health Coordination (RDMHC) Programs. Revisions will be made as necessary. The document will be posted to EMSA's website shortly.

SITUATION SUMMARY

Tropical Storm Polo, Eastern Pacific Ocean

Polo is currently a Tropical Storm located off the coast of southwestern Mexico. Tropical Storm Polo is traveling in a northwestward motion which is expected to carry through Saturday. Currently, maximum sustained winds are near 70 mph with higher gusts extending up to 105 miles from the center. [The combination of strong unfavorable upper-level easterly winds over Polo and cool waters should result in gradual weakening.](#) Consequently, the National Hurricane Center forecast calls for Polo to become a depression or remnant low in about 3 to 4 days well to west of Baja California.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

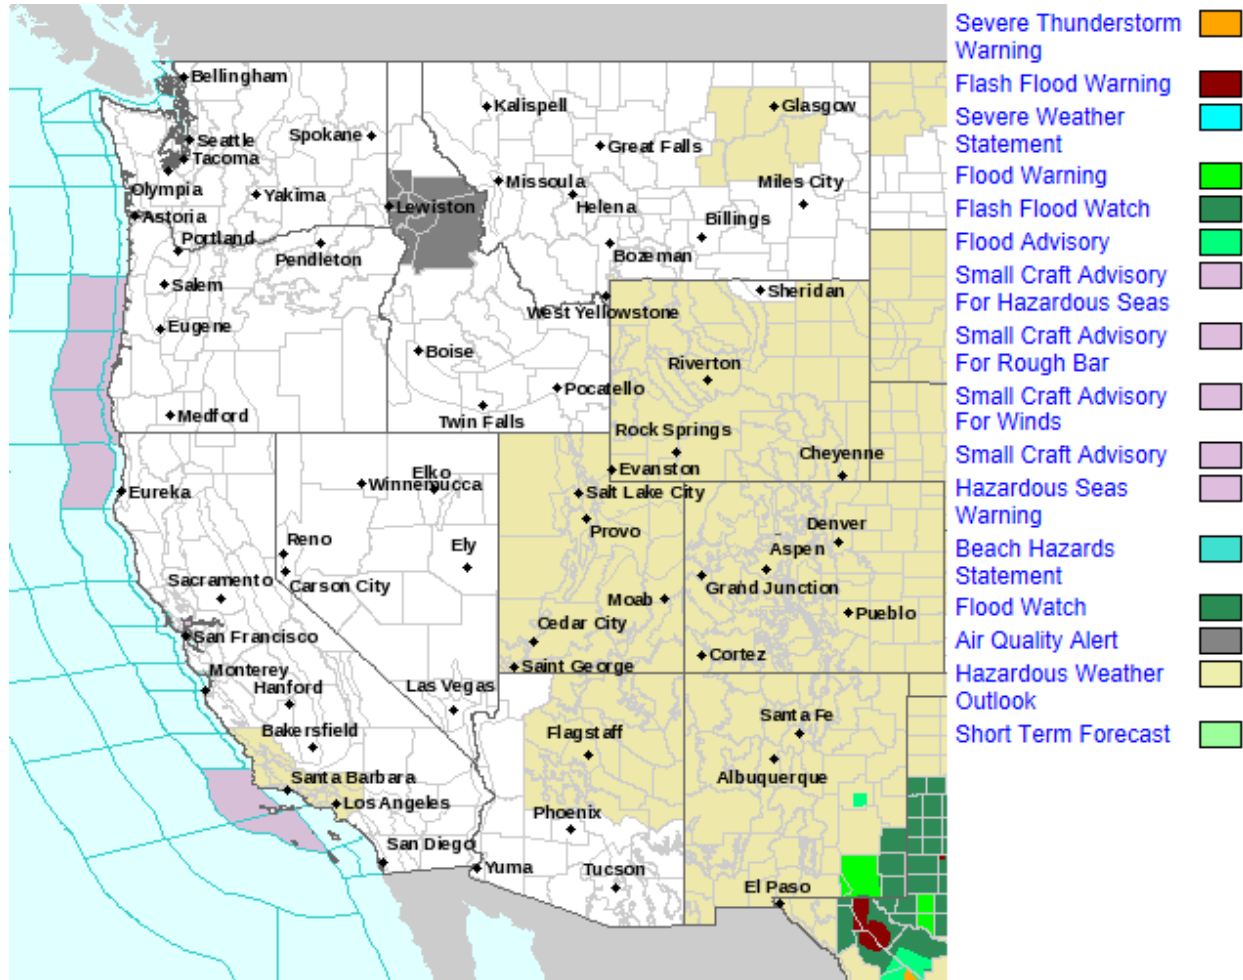

NORTHERN CALIFORNIA

The low pressure responsible for the unsettled weather Wednesday and Thursday has drifted south to just off the Southern California coast this morning. A dry offshore flow will be over the Northern Operations area through Sunday as the low spins near and over Southern California through Saturday, then moves northeast into Western Nevada on Sunday. Northeast/offshore surface winds will become locally gusty (gusts 20-30 mph) from the lower Western Sierra slopes to the coast tonight and early Saturday, enhancing the warming and drying trend. Thunderstorms may move up the east side of the low to the Central Sierra Saturday afternoon, and there is a chance that storms may reach as far north as the Eldorado National Forest and Tahoe National Forest late Saturday. Thunderstorm chances will continue along, and east of, the Cascade-Sierra crest on Sunday as the low moves northward through western Nevada. Cumulus buildups are possible elsewhere over the higher terrain of the Northern Operations region on Sunday. Another low pressure trough will reach the area on Monday. Southwest winds will increase across the region and conditions will become cooler and more humid. There is a slight chance of rain in far northwest California late Monday with the arrival of the first wave from this large system. A stronger and wetter wave will arrive Wednesday and bring wetting rain and strong winds to the majority of the Northern Operations region through Thursday, followed by a gradual return to high pressure next Friday.

SOUTHERN CALIFORNIA

A weak area of low pressure off the California Coast will bring isolated afternoon showers and thunderstorms to the Sierra through this weekend. Isolated afternoon showers and thunderstorms will be possible across all mountain and desert areas Saturday. This low pressure area will also cause temperatures to be around 5 degrees below normal through this weekend, with upper 60s and 70s in the mountains and 80s to low 90s in the valleys. Minimum relative humidity will be mainly between 20% and 40% away from the coast through this weekend. The marine layer will be between 3,000 and 4,000 feet deep through this weekend, with morning low clouds and fog making it over the lower coastal mountain slopes. A ridge of high pressure will build into California from the southwest causing temperatures to become around 5 degrees above normal and relative humidity to drop to between 12% and 25% Monday through the middle of next week. Winds will be light across the region through the middle of next week, except there will be strong and erratic winds in and near any thunderstorms.

Cal OES
GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

SITUATION SUMMARY

Magnitude 6.0 Earthquake, American Canyon, Napa County

Recovery

- Based on a request for additional IA information for the major disaster declaration request, IA teams conducted PDAs 09/8/14 through 09/12/14 in Napa County, the City of Vallejo, and Solano County. IA PDA teams conducted additional PDAs 9/17/14 through 9/19/14 finalizing PDAs in Napa County.
- The City of Napa website has information regarding earthquake recovery resources.
- Cal OES Recovery PA worked closely with the Operational Areas to schedule the PA Applicants Briefing to advise state agencies, local governments, and private non-profit organizations impacted by the earthquake the types of assistance available and the programmatic guidelines. Time and location: 09/23/14 at 1000 hours at the Napa Valley Exposition in the Chardonnay Hall, 575 3rd Street, Napa, CA.
- The Napa Long Term Recovery Committee (LTRC) is in the process of forming its leadership, establishing policies and procedures, and identifying a Mission statement. A follow up meeting is pending.
- State Voluntary Agency Liaison (VAL) participated in a Long Term Recovery discussion meeting on Monday, 09/15/14. Participants included several voluntary organizations, state and federal VAL, and leadership from Northern CA and Solano VOAD. A presentation on long term recovery and update on current recovery efforts was provided. Due to the absence of local faith based and other organizations that may have resources, SVOAD will reach out to expand the engagement of additional nonprofit and faith based partners. Once the organizations are identified, a follow up meeting will be held in hopes of identifying key leaders interested in forming a LTR committee.
- American Red Cross Assistance Center: Napa Marriott Hotel opened on 09/01/14 from 1000 to 1900 hours for Napa and Solano County; center will be open for two weeks.
- Local Assistance Center (LAC): County and City of Napa: LAC opened on 09/08/14 at 301 1st Street, Napa (corner of 1st Street and Silverado Trail). The LAC is open until further notice.
